EXPERIENCE

Rezrek

Full-Stack Developer Intern

Ahmedabad, IN

May 2024 – Present

- Built a content-driven e-commerce MVP from scratch with 10+ core features, including explore, reels, wishlist, cart and more
- Designed a responsive, modular frontend with React, Tailwind, & TypeScript, optimising initial page size by **86.6%**
- Engineered a RESTful API handling 200 req/sec with a **~0.1s** average response time using Node.js, Express.js, & MongoDB
- Improved backend performance by integrating Redis caching, reducing response times by **99.2%** from 200ms to 1ms

LyfeLane

Software Developer Intern

Remote

Sep – Dec 2024

- Developed a web platform with a Canva-like editor to create greeting cards and send event invitations, serving 100s of events
- Leveraged React, Node.js, Express, Firebase, and Gmail API to enable seamless invite creation, management, and delivery

Govardhan Infotech

Android Developer Intern

Surat, IN

Jan – July 2023

- Led a team of 5 to build a public transportation system, delivering Android apps for passengers, drivers, and admins
- Boosted operational efficiency with QR ticketing, e-bus passes, e-wallets, and a real-time map module using Java & Firebase

Freelancer

- Delivered tailored solutions for 10+ client projects, handling requirements, design, development, and deployment
- Led to a 20% increase in client retention through efficient workflows and high-quality deliverables ensuring on-time launches

EDUCATION

B.Tech in Computer Science – Pandit Deendayal Energy University – 8.2 GPA

Aug 2023 - Present

Diploma in Computer Engineering – Gujarat Technological University – 8.7 GPA

Aug 2020 - Jun 2023

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, C, SQL, PHP

Databases: MySQL, MongoDB, Redis, Firebase, Supabase, SQLite

Tools: Git, Android Studio, Amazon Web Services, Google Cloud Platform, Docker, Postman

PROJECTS

General-purpose Personal AI Assistant

heygaia.io

- Created a robust AI assistant using Next.js, TypeScript, Python, FastAPI, MongoDB, Redis, GCP, and Docker
- Integrated natural language calendar scheduling with Google OAuth and enabled real-time search via Bing & web scraping
- Enhanced productivity with an AI roadmap generator and a RAG-based retrieval system for notes, files, and memories
- Implemented email syncing via Gmail API, using Celery & RabbitMQ for AI-driven prioritization and summarization

AI-Powered YouTube Shorts Creator

[Demo](#)

- Automated AI-powered YouTube Shorts generation using Python & Flask, achieving 10,000+ views from a single prompt
- Reduced production time by automating script creation, voiceovers, subtitles, background media, and publishing to YouTube

OPEN-SOURCE CONTRIBUTIONS

Rocket.Chat – Open Source Contributor

- Fixed Critical Localization Bug in Leave Room Warning Modal [View PR](#)
- Enhanced Mobile UX by Fixing Sidebar Navigation in Admin Settings [View PR](#)
- Enabled Custom Text Addition While Forwarding Messages for Better Context and Communication [View PR](#)
- Revamped GUI Crash Page with Detailed Error Reporting for Faster Debugging [View PR](#)
